

Grinch Paper Plate Craft

Supplies:

- green cardstock paper
- yellow cardstock paper
- black construction paper
- white cardstock paper
- green paper plate
- glue
- white pom pom
- scissors

How to make a Grinch paper plate craft:

Gather supplies. Trace out eyes on yellow paper. Cut smaller pieces of red paper to glue on the yellow eyes. Cut out a triangle from the red paper. Cut a white strip of paper to glue on the bottom of the triangle (or hat). Cut out a mouth from the black paper and a few eyelashes. Let the kids help glue the eyes on the plate. Glue the mouth and eyelashes on too. Then glue on the hat. Make sure to glue the white pom pom to the top of the hat.

Grinch Mask

Directions: Cut out the outline of your Grinch head from your poster board . Next let the kids color, paint or decorate the Grinch face however they like. Glue on your Popsicle stick and use your black sharpie to draw on the rest of the Grinch details.

Supplies:

- Poster board/ cardstock paper
- Crayons
- One large popsicle stick
- Black sharpie
- Glue
- Scissors

Popsicle Stick Grinch Craft

SUPPLIES:

- Popsicle Sticks (11)
- Green Craft Paint
- Black Sharpie
- White and Blue Paint Pens
- Craft Glue
- Red and White Construction Paper

DIRECTIONS:

1. Start off by using 3 popsicle sticks cut down to support the back of the other 8. I have used cardstock in the past and it works but I have found that supporting with craft sticks works a little better.
2. Once the glue is dry you can flip over the craft and paint the entire front a grinchy green, very technical color. Haha!
3. Using your red and white construction paper cut out the Santa hat and glue the white pieces onto the red. This doesn't have to be perfect as the Grinch didn't cut out his fabric hat perfect either.
4. Now take a little craft glue to attach the hat and using a black sharpie draw on the Grinch's face. We chose to use a happy Grinch. As this little guys, the heart just grew.
5. Finish up your Grinch with some white and blue in the eyes and to add a little dimension to the hat with a sharpie.
6. Finally, if you want to turn him into a magnet I recommend a .75 inch adhesive magnet to hold it up. You could also attach some ribbon and turn him into a ornament.
